# QUOTATION

**Date:** 12 Nov 2025
**Quotation No.:** QUO-2025-11-12-01
**Client:** EVOA Technology Pvt Ltd

As per our discussion, please find below our **quotation** for front-end development for **EVOA Technology Pvt Ltd**. We will enhance your basic Figma design and deliver a clean, responsive **React** UI integrated with your APIs. This quotation includes the scope of work, deliverables, timeline, and transparent pricing.

## Scope of Work

1. **Design Enhancement**

   - Upgrade the provided Figma wireframes into a polished UI (layout, color, typography, spacing, micro-interactions).

   - Establish a lightweight design system (tokens for colors, spacing, type scale; basic component guidelines).

2. **Front-End Development (React)**

   - Build a responsive React application using modern tooling (Vite/Next.js).

   - Component library for shared UI (buttons, forms, cards, navigation, modals, notifications).

3. **API Integration**

   - Integrate with client-provided REST/GraphQL endpoints; mock data until APIs are ready.

4. **Quality Assurance**

   - Cross-browser testing (latest Chrome, Edge, Firefox, Safari) & responsive checks for common breakpoints.

   - Unit tests for critical components.

5. **Handover**

- Source code in a private Git repository.

---

## Deliverables

- React codebase with modular components and routing.

- Environment configuration, build/deploy scripts.

- Brief documentation and component usage notes.

---

## Timeline

- **Estimated Duration:** 4 weeks

*Timeline assumes timely feedback within 1–2 business days per review cycle.*

---

## Commercials

**Fixed Price: ₹20,000 + GST**
Covers the scope stated above for up to **20 screens** and **2 revision cycles** on the enhanced design. Additional screens beyond 20 is **₹1,000/screen**

---

## Payment Terms

- **50%** advance to commence, **50%** on UAT sign-off (before production handover).

- Payment due within **7 days** of invoice.

---

## Assumptions

- Client provides the initial Figma, brand assets (logo, colors), and API specifications/keys.

- Content (copy/images) is supplied by the client unless otherwise agreed.

### Exclusions (available as add-ons)

- Backend development, authentication/authorization flows, complex animations/3D, advanced analytics setup, SEO content writing, multi-language i18n, and ongoing maintenance/feature roadmaps.
